Employee Expense Process Improvement

Business Process & Digital Change Case Study

Project Context
This project looks at an employee expense process where an online system is already in place, but employees are experiencing delays with approvals and reimbursements.

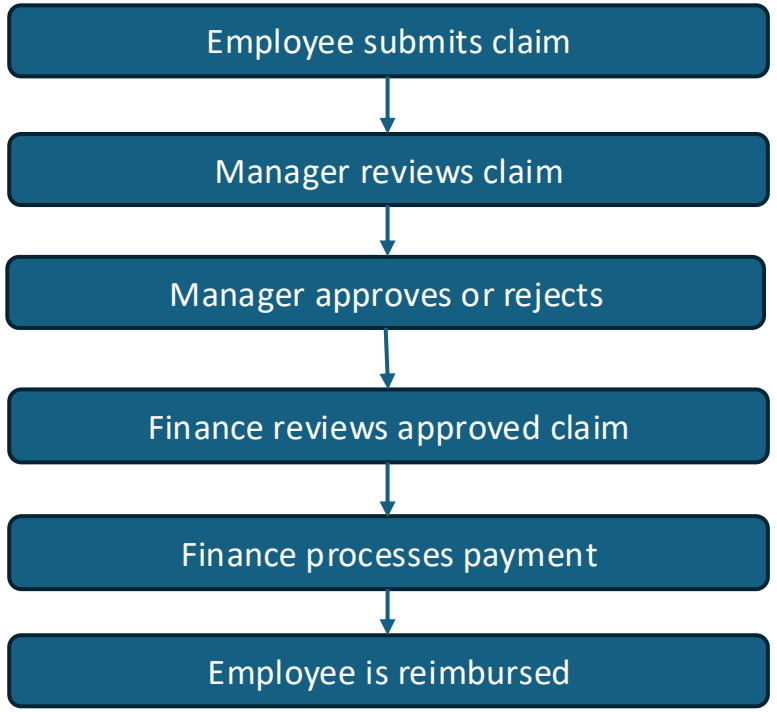

Objective
To look at the current process, identify where problems occur and suggest changes that could make the process quicker and easier for employees while keeping the required checks.

Fictional case study created for portfolio purposes.

Current Process (As-Is)

Key Problems

- Claims can sit waiting for manager approval.
- Approved claims can still take time to be processed by Finance.
- Employees have limited visibility of where their claim is.
- The process depends heavily on people manually taking the next action.

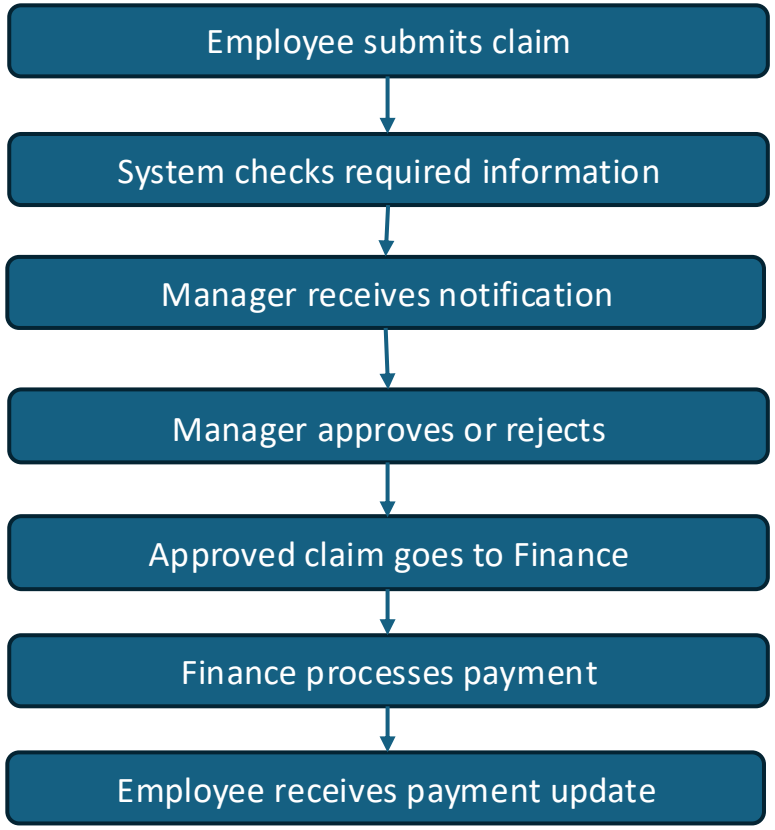

Proposed Process (To-Be)

Improvements

- Automatic checks before submission
- Notifications for new claims
- Reminders for outstanding approvals
- Claim status tracking
- Automatic employee updates

.

Business Requirements

Requirement	Why it is needed
Receipt upload	Employees need to provide evidence for claims
Required field checks	Reduce incomplete claims
Manager notifications	Helps claims to get reviewed sooner
Automatic reminders	Reduce claims sitting unreviewed
Claim status tracking	Employees can see where their claim is
Finance view of approved claims	Make it easier to manage claims ready for payment
Payment notifications	Employees know when reimbursement has been processed

Stakeholders & Change Impact

Change Considerations

- Test the changes before introducing them.
- Give employees and managers clear guidance.
- Provide support after the changes go live.
- Monitor whether approval and reimbursement times improve.

Stakeholder	How they are affected
Employees	Clearer process and better visibility of claims
Managers	Notifications and reminders for claims requiring approval
Finance Team	Clearer view of approved claims waiting for processing
IT / Support	Supports system changes, testing and technical issues

Recommendation

Main recommendation:
Improve the existing expense process rather than replacing the whole system.

What should change	Expected Benefits
Add automatic checks to reduce incomplete submissions.	Faster approvals and reimbursements
Use notifications and reminders to reduce approval delays.	Less manual follow-up
Give employees better visibility of their claim status	Better visibility for employees
Give Finance a clear view of claims waiting for payment.	More efficient expense process
Track approval and reimbursement times after the changes.	Required approval checks are still maintained
